# CHILDHOOD DOMESTIC VIOLENCE (CDV)

Is when you grow up living in a home with violence between your parents or violence towards a parent, from a stepparent or significant other.

## CDV impacts 1 in 7 people in our community!

55 million Americans (children and adults who were these children) in our nation.

It has a “profound and lasting impact on a life.” They are...

- ❖ 6x more likely to commit suicide...
- ❖ 50% more likely to abuse drugs or alcohol...
- ❖ 74% more likely to commit a violent crime...
- ❖ And it is the **SINGLE BEST PREDICTOR** of becoming a victim or perpetrator of domestic violence later in life.

**BUT...no one knows about it!**

**CDV has <15% public awareness...**

and no widely practiced solutions to curb it.

## YOU CAN HELP US CHANGE THAT!

Help bring awareness to what UNICEF calls

“one of the most pervasive human rights challenges of our time!”
